

## Working:

Facebook Application Hosting Using AWS. So, the Chatbot has been integrated on Facebook with the help of Facebook Developer API by the page name Nis ChatBot. Any user can test it from his/her facebook account.

But all in all,

Speech recognition and natural language understanding are some of the most challenging problems to solve in computer science, requiring sophisticated deep learning algorithms to be trained on massive amounts of data and infrastructure. Amazon Lex puts deep learning technologies within reach of all developers, powered by the same technology as Alexa. Amazon Lex chatbots convert incoming speech to text and understand the user intent to generate an intelligent response, so you can focus on building your bots with differentiated value-add for your customers, to define entirely new categories of products made possible through conversational interfaces!
